

Computing for Mathematics: Handout 6

This handout contains a summary of the topics covered as well as outline of expected progress.

For further practice you can do the exercises available at the documentation chapter of Python for Mathematics.

1 Expected progress

At the end of this week you should start writing your documentation.

- Write your `README.md` file.

At this stage I'd expect you to have your final `README.md` file.

2 Summary

The programming topics covered in the documentation chapter are:

- Writing documentation using the Diataxis framework:
 - Step by step example usage in a tutorial.
 - Precise how to instructions in how to guides.
 - Details of concepts in the explanation section.
 - Background reading and information in the reference section.
